Professional Summary

Front-End Developer Specializing in React, with hands-on experience building full-featured web applications including e-commerce platforms. Skilled in Rest API integration, authentication systems, and dynamic UI development. Strong focus on responsive design, performance, and user experience. Passionate about building clean, scalable, and user-friendly applications.

Technical Skills

Frontend Development:
Html5, CSS3, JavaScript(ES6+), React.js, Bootstrap, Tailwind CSS, Responsive Web Design Core Skills:
RESTful API Integration(Axios/Fetch), Authentication (LocalStorage-based), State Management (React), CRUD Operations(Create, Read, Update, Delete) Programming:
C#, ASP.NET MVC Core (basic integration experience), Linq(data querying concepts) Databases:
MySQL, SQL Server
Tools:
Git, GitHub, WordPress, Figma to UI conversion, Debugging & Developer Tools Concepts:
OOP, MVC
Soft Skills :

Problem Solving, Critical Thinking, Team Collaboration, Communication Skills, Time Management, Adaptability, Attention to Detail, Self-learning & Continuous Improvement, Ability to work under pressure, Project ownership & responsibility.

Experience

Front-End Developer Intern (2025 Dec – 2026 Apr) at VICA WEB SOLUTION

Developed responsive web interfaces using HTML, CSS, and JavaScript, React.js, Tailwind CSS, Axios, and bring any Figma design into Life, assisted in building and improving user interfaces for real client projects Collaborated with developers and designers to enhance user experience Gained hands-on experience working in a professional development environment Followed best practices in code structure and UI implementation

- Junior frontend Developer and WordPress publisher (Part Time)
Divvmen -Saudi Arabia (Remote) – (Jun 2023 – Sep 2023)
Developed and maintained responsive user interfaces, managed and published website content using WordPress, Updated product data and handled currency adjustments, collaborated with team members to improve usability and performance.

Projects

E-commerce Web Application (React.js)
Developed a full-featured e-commerce web application using React with advanced functionality and dynamic data handling.
Key Features:

- Integrated REST APIs for dynamic product data, implemented full shopping cart functionality (add/remove/update quantity), Built authentication system (login/register using LocalStorage), Added product filtering and categorybased navigation and product details, Implemented skeleton loading and notifications for enhanced UX, fully responsive design across all devices.

Technologies Used:
React.js, JavaScript (ES6+), HTML5, CSS3, REST APIs, Skeleton load, Tailwind CSS, React-router-dom, React-icons Live Demo: https://shop-cco.netlify.app/
GitHub: https://github.com/Sahar-Jw/Shop.Co

Dashboard Application (React)
Developed a fully functional and responsive admin dashboard using React.js, featuring authentication, role-based access, and full CRUD operations. The application integrates multiple APIs to manage and manipulate product data efficiently.

- Key Features:

User authentication system (login & logout functionality), Protected routes for secure dashboard access, Add, edit, delete, and display products (CRUD operations), API integration for dynamic data

handling, Responsive and modern UI design optimized for all devices, Organized component-based architecture using React.
Technologies Used:
React.js, JavaScript (ES6+), HTML5, CSS3, REST APIs, React-router-dom, React-icons, Tailwind CSS
Live Demo: https://reliable-biscotti-6d888b.netlify.app/
GitHub: https://github.com/Sahar-Jw/Dashoard

Hospital Management System

A web application that facilitated communication between patients, doctors, and staff. It also automated necessary interactions among the staff and made information sharing easier. For the frontend I was Responsible for designing and implementing all frontend interfaces in the project using HTML, CSS, JAVASCRIPT, BOOTSTRAP, and I helped the backend team work with mvc core I have a good background in it, my work centered on it via Linq.

This was my graduation project and it got the highest mark among the projects in my year. here is the documentation Link

Education

DIPLOMA OF SOFTWARE ENGINEERING (DAMASCUS UNIVERSITY)
2022 - 2023
the graduation project that I participated in got a high mark which was 92%
